

What's Happening Wednesday

Kansas Immunization Program

VFC Consultant on Call -

The Consultant on call is Jayme Lewis at Jayme.lewis@ks.gov or she can be reached by calling 785-296-5592.

May 31st, 2017

Chief Chat—

We want to thank all of the VFC providers who completed your annual VFC enrollment on time this year. Meeting this requirement is essential for our program to remain in compliance with CDC funding requirements. We have worked diligently to streamline this process and automate it as much as possible in hopes of minimizing the time you must spend preparing it. Darrin Rosebrook, the Managing Director of the IV4 system that we use for electronic enrollments and other WebIZ processes will be at the conference next week, and is interested in hearing from you about the successes and challenges you find as an end user of the systems. If you have interest in sharing thoughts with him, please look him up (the KS WebIZ staff at the vendor table can assist you in locating him) and share your comments.

We are all very excited about the conference next week and sharing time with over 300 of our statewide partners. As we continue to strive each year to bring you a great conference, it is only through your support and participation that it is possible. We encourage you to take time throughout the conference to visit with the vendors and ask questions you may have. We have amazing nationally and internally known experts in the field of immunizations who will be coming in to share and challenge us in continuing to improve our practices. We have expanded the space we are using at the conference center to allow more space for breakouts, networking, and event activities. Our plenaries and meals (yes, we are bringing back breakfast) will be held in the arena portion of the building this year which will allow more space for the vendors and break area. We will also have access to many more restrooms for your convenience.

A 2017 supplement to the 13th Edition of the Pink Book is now available. The supplement reflects the latest ACIP recommendations since the latest publication of the Pink Book in 2015. The Pink Book supplement is a resource intended for immunization providers, and includes supplementary immunization information on human papillomavirus vaccine, meningococcal vaccines, and pneumococcal vaccines. You may [download the twelve page supplement](#) from the CDC website. If you have any questions regarding the Pink Book or the supplement, please email nipinfor@cdc.gov.

Phil Griffin

Deputy Director, Bureau of Disease Control and Prevention

What's Happening Wednesday
will not be published next week
as staff will be at the
Immunization Conference

DID YOU KNOW?

Updated Recommendations for Use of MenB-FHbp Serogroup B Meningococcal Vaccine - Reminder Advisory Committee on Immunization Practices, 2016 was published in the [MMWR May 19, 2017 edition](#). The Advisory Council for Immunization Practices updated these recommendations late in 2016 based on the Food and Drug Administration approval of a new dosing option for Trumenba. The updated recommendations are regarding use of the 2- and 3-dose schedules of MenB-FHbp vaccine (Trumenba) and replace previous ACIP recommendations for use of MenB-FHbp vaccine published in 2015 (3,4). Recommendations regarding use of MenB-4C (Bexsero) are unchanged (3,4).

Persons aged ≥ 10 years at increased risk for serogroup B meningococcal disease (Category A recommendation). For persons at increased risk for meningococcal disease and for use during serogroup B meningococcal disease outbreaks, 3 doses of MenB-FHbp should be administered at 0, 1–2, and 6 months to provide earlier protection and maximize short-term immunogenicity. However, if the second dose of MenB-FHbp is administered at an interval of ≥ 6 months, a third dose does not need to be administered.

Adolescents and young adults aged 16–23 years (Category B recommendation). When given to healthy adolescents who are not at increased risk for meningococcal disease, 2 doses of MenB-FHbp should be administered at 0 and 6 months. If the second dose of MenB-FHbp is administered earlier than 6 months after the first dose, a third dose should be administered at least 4 months after the second dose.

VFC Question of the Week-

Q: *Our vaccine storage unit has been out of range. Our vaccines have been moved to our emergency location. How do I monitor temperatures in the empty vaccine unit? We have the KIP data loggers.*

A: Primary thermometers, including data loggers provided by the Kansas Immunization Program, are to be kept with vaccines at all times. You should use your primary thermometer or data logger to monitor temperatures during your emergency vaccine transport. Your primary thermometer or data logger should then remain with the vaccine.

You should use your back up thermometer to monitor and record temperatures in your empty unit. Check to make sure your back up thermometer has a certificate of calibration and within the current calibration date.

Mumps In Kansas– 150 Cases Reported

As of May 30th, 2017, there have been no change in the number of confirmed and probable mumps cases. There were 150 mumps cases reported in Kansas in multiple counties in the state. We are starting to see a decrease in the number of cases being reported and testing positive for the mumps virus. The Kansas Department of Health and Environment and affected local health departments are working closely together to identify cases and implement appropriate isolation and exclusions policies to prevent further spread of mumps. Mumps cases have been reported in the following counties: Atchison, Barton, Brown, Clay, Crawford, Douglas, Ellis, Finney, Franklin, Graham, Johnson, Labette, Leavenworth, Lyon, Marshall, Miami, Montgomery, Nemaha, Riley, Rooks, Thomas, Trego, and Wyandotte.

Mumps is a contagious disease caused by a virus and typically starts with a few days of fever, headache, muscle aches, tiredness and loss of appetite, followed by swollen salivary glands. Please be mindful of the signs and symptoms of mumps, have appropriate laboratory testing completed when indicated, and **immediately report any suspicion of mumps to KDHE at 1-877-427-7317**. The Kansas Department of Health and Environment is still monitoring this situation and posting weekly update [here](#).

KSWebIZ Trainings–

Aggregate Inventory Training

The Aggregate Inventory Training occurs every Monday from 1p-2p, and the first Friday of every month from 10:30a-11:30a. This call will go over the basics of the On Hand, Reconciliation submission, Vaccine Ordering and Return windows in KSWebIZ for Aggregate Users. Bring questions and examples of issues that your clinic is having with the end of the month reporting. **Please note: this call is for KSWebIZ**

Aggregate (HL-7) Users Only!

Register now for the date that works best for you!

Direct Entry Inventory Training

The Direct Entry Inventory Training occurs every Tuesday from 1p-2p, and the first Friday of every month from 12p-1p. This call will go over the basics of the On Hand screen, Reconciliation submission, and Vaccine Ordering and Return windows in KSWebIZ. Bring questions and examples of issues that your clinic is having with the end of the month reporting. **Please note: this call is for KSWebIZ Direct Entry Users Only!**

Register now for the date that works best for you!

<https://attendee.gotowebinar.com/rt/4121654947304535298>

New User Training

The New User Training occurs every Thursday from 2p-3p, and the second Friday of every month from 12p-1p. This basic training is for new KSWebIZ users, or people who would like a simplified refresher training on how to use KSWebIZ. We will be going over log-in, adding history, administering vaccinations, printing consents and pink cards. If you are a new user, please take the time to sit in on this training! **Please note: this call is for KSWebIZ Direct Users Only!**

Register now for the date that works best for you!

<https://attendee.gotowebinar.com/rt/1572841858584797442>

School Module Training

The School Module Training occurs on the third Friday of every month from 9a-10a. This basic training is for new KSWebIZ school module users, or people who would like a simplified refresher training on how to use the KSWebIZ School Module. We will be going over log-in, adding history, education, and printing reports. Please take the time to sit in on this training! **Please note: this call is for KSWebIZ School Module Users Only!**

Register now for the date that works best for you!

<https://attendee.gotowebinar.com/rt/8422671756415350273>

Reports Training

The Reports Training occurs the fourth Friday of every month from 12p-1p. This training is for KSWebIZ users who are wanting to learn more about the KSWebIZ Reports module. We will be going over the most often used reporting sections and how to generate reports within these sections. We hope you have time to sit in on this training! **Please note: this call is for KSWebIZ Direct Users Only!**

Register now for the date that works best for you!

<https://attendee.gotowebinar.com/rt/568840407867357186>

Pharmacy Training

The Pharmacy Training occurs every Monday from 10a-11a and every Wednesday from 12p-1p. This training is for KSWebIZ pharmacy users that are new or would like a simplified refresher training on how to report immunizations to the state registry in compliance with statute KS65-1635a. The training will consist of, logging-in, searching a patient, updating patient demographics, and adding immunizations. Please take the time to attend this training! **Please note: this call is for KSWebIZ Direct Entry Pharmacy Users Only!**

Register now for the date that works best for you!

Vaccine Information Statements–

Anthrax	3/10/10	MMR	4/20/12
Chickenpox	3/13/08	Tdap	2/24/15
DTaP/DT/DTP	5/17/07	MMRV	5/21/10
Hepatitis A	7/20/16	Multi-vaccine	11/05/15
Hepatitis B	7/20/16	PCV 13	11/05/15
Hib	4/2/15	PPSV	4/24/15
HPV9	12/2/16	Polio	7/20/16
HPV4 (Gardasil)	5/17/13	Rabies	10/6/09
HPV2 (Cervarix)	5/03/11	Rotavirus	4/15/15
Influenza (LAIV4)	8/07/15	Shingles	10/6/09
Influenza (IIV3 or IIV4)	8/07/15	Smallpox	10/01/09
Japan. enceph.	1/24/14	Td	4/11/17
MCV4/MPSV4	3/31/16	Typhoid	5/29/12
MenB	8/09/16	Yellow fever	3/30/11

Vaccine Redistribution

Please email any additions or changes to be made on the Vaccine Redistribution lists with subject matter “Redistribution” to kdhe.vaccine@ks.gov or call toll free at 1-877-296-0464 http://www.kdheks.gov/immunize/vaccine_redistribution.htm

REMINDERS: Providers may place the excess doses on the KIP Redistribution list if:

- 1) The vaccine has a minimum of 90 days and a maximum of 365 days before the vaccine's expiration date;
- 2) The ordering provider is responsible for any doses which expire on the redistribution list that have not been accepted for transfer to another VFC provider;
- 3) Providers accepting vaccine from the redistribution list are responsible for using the doses once they are transferred. KIP encourages providers to accept only doses they can administer before the expiration date;
- 4) The transferring and receiving provider will document these doses on their monthly MIR/reconciliation reports as transferred vaccines.
- 5) Once vaccine is transferred please contact KIP to let us know so we can adjust the redistribution list by either deleting the line or by reducing the amount of doses.
- 6) All vaccines must be in full boxes
- 7) The KIP nurse consultant who is on call must be contacted prior to transferring vaccine
- 8) Providers are responsible for keeping KIP notified if there is a change in amount of doses available for redistribution.
- 9) When placing an order, you may be contacted if the vaccine you are trying to order is on the redistribution list.
- 10) Varicella and Proquad, will not be posted on the VFC or Private Vaccine Redistribution List. Frozen Varivax vaccines are very intolerant to out of range temperatures. To prevent potential vaccine waste the Kansas immunization Program requests that Varivax containing vaccines not be transferred to other providers. Questions regarding transporting vaccine call 877-296-0464 to request assistance.
